

Empowerment Practice in St. Vincent and the Grenadines

This course will prepare students to do empowerment practice in an international setting. It will introduce students to the internal and external blocks such as poverty and cultural imperialism that affect the people of St. Vincent and the Grenadines. Attention will also be placed on the intersection of macro forces such as poverty, gender, and rurality, and how they affect Vincentians. The class will then highlight different empowerment approaches and strategies that can be used when practicing with people from developing countries.
